

Tanko is a game for 3 to 6 year old children to boost their imagination. With this game, the children can draw animals or even set up their own hut.

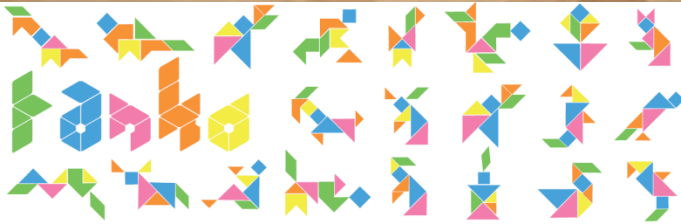

Tanko is a great game for several children, they can play together, learn to share and create as a team.

As a great shock adsorber, they can jump on it, build with it, it will always get back to its initial form

Children can make, remake or create whatever they want. Their imagination is the unique limit. They have no risk to play with Tanko.
